Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

If you want to make sure your home or office equipment repair is done right or that you are keeping track of your car, motorcycle or other vehicle repairs and maintenance, grab a copy of our Maintenance Log Book and keep track of equipment and general maintenance procedures. It is simple and easy to use because it enables the user to document every repair with date and what has been done. It is designed to log all repairs and new equipment and it is a log book that records maintenance and repairs of virtually any piece of equipment or vehicles.

Introduced in 1997, the GM LS engine has become the dominant V-8 engine in GM vehicles and a top-selling high-performance crate engine. GM has released a wide range of Gen III and IV LS engines that deliver spectacular efficiency and performance. These compact, lightweight, cutting-edge pushrod V-8 engines have become affordable and readily obtainable from a variety of sources. In the process, the LS engine has become the most popular V-8 engine to swap into many American and foreign muscle cars, sports cars, trucks, and passenger cars. To select the best engine for an LS engine swap, you need to carefully consider the application. Veteran author and LS engine swap master Jefferson Bryant reveals all the criteria to consider when choosing an LS engine for a swap project. You are guided through selecting or fabricating motor mounts for the project. Positioning the LS engine in the engine compartment and packaging its equipment is a crucial part of the swap process, which is comprehensively covered. As part of the installation, you need to choose a transmission crossmember that fits the engine and vehicle as well as selecting an oil pan that has the correct profile for the crossmember with adequate ground clearance. Often the brake booster, steering shaft, accessory pulleys, and the exhaust system present clearance challenges, so this book offers you the best options and solutions. In addition, adapting the computer-control system to the wiring harness and vehicle is a crucial aspect for completing the installation, which is thoroughly detailed. As an all-new edition of the original top-selling title, LS Swaps: How to Swap GM LS Engines into Almost Anything covers the right way to do a spectrum of swaps. So, pick up this guide, select your ride, and get started on your next exciting project.

What is the Grand Canyon? Who lives there? Read the book to learn more about the Grand Canyon.

Annotation World Bank Living Standards Measurement Study No. 112. Assesses evidence of a negative correlation between the number of children born and levels of child schooling by examining their determinants. In many developing countries, as parents have fewer children, they invest more in the health, education, and welfare of each child. This "quantity-quality tradeoff" is vividly illustrated in the recent economic development of Southeast Asia and Latin America. In Sub-Saharan Africa, however, the existence of such a tradeoff has not been established. The few studies conducted to date reveal either no correlation or a slightly positive one, whereby higher fertility rates are linked to greater schooling per child. This study examines the determinants of fertility and of child schooling in C te d'Ivoire and Ghana to assess evidence of a tradeoff, using data from three surveys conducted between 1985 and 1987. The results are mixed. In C te d'Ivoire, there is evidence of such a tradeoff in urban areas but not rural ones. In urban areas, female schooling, higher income, and improved child survival are associated with lower fertility and higher child schooling. In both rural and urban areas of Ghana, there is a tradeoff between fertility and child schooling with higher incomes, and, in rural Ghana, with increases in mothers' schooling. Also available in French ("La relation entre le nombre des enfants et de la scolarisation: Le cas de la C te d'Ivoire et du Ghana"): (ISBN 0-8213-3374-7) Stock No. 13374.
