The below is an excerpt from the new book by passing guru and friend of Smart Football, Dan Gonzalez, titled Recoded and Reloaded: An Updated Structure for a Complete Passing Game at Any Level, which expands and builds on his earlier book, Concept Passing. You can find the book on Amazon and CreateSpace. For all the talk in football about “systems” — the Air Raid system, the West Coast Offense, the Run and Shoot, a Pro-Style System — there is very little discussion of how does one go ...

After accumulating two decades worth of working knowledge in some of football's most accomplished passing systems, Coach Gonzalez delivers an apparatus that concentrates that knowledge. Teaching and coaching pass offense has never been made more simple, direct, or multiple, as Gonzalez has created a language that can be installed at any level, and streamlines even the most advanced pass concepts. A former Division I player and collegiate offensive coordinator, Dan Gonzalez once again blends his working knowledge of the West Coast, Run and Shoot, and Spread No-Huddle offenses, and distills the teaching of virtually any passing game into just three “Advantage Principles” and three “Read Concepts.” Furthermore, the simplicity of the system is such that it can be taught to players of any age, giving an excellent springboard to beginning players or coaches. Moreover, the principal secrets of some of most prolific passing games in history are unlocked for advanced coaches. With over 200 *FULL COLOR* diagrams and a guide to installation, this is must read for coaches, players, and even fans who want to further their understanding of the passing game.

To effectively overcome the problems presented by modern defenses, a complete passing game must possess both diversity and learnability. Concept Passing: Teaching the Modern Passing Game combines these two characteristics. Chapters include: Defining Concept-Based Passing, Formations and Personnel Groupings, Passing Game Terminology, Protection Schemes, The Drag Concept, The Vertical Concept, The Two-Man Game Concept, The Quick Concept, The Corner Concept, The Horizontal Concept, The Numbers Concept, The Three-Level Concept, The Object Concept, and Application of Pass Concepts.

Winner, 2018 Aldo and Jeanne Scaglione Prize for Studies in Germanic Languages and Literatures, Modern Language Association Winner, 2018 German Studies Association DAAD Book Prize in Germanistik and Cultural Studies. From the current vantage point of the transformation of books and libraries, B. Venkat Mani presents a historical account of world literature. By locating translation, publication, and circulation along routes of “bibliomigrancy”—the physical and virtual movement of books—Mani narates how world literature is coded and recoded as literary works find new homes on faraway bookshelves. Mani argues that the proliferation of world literature in a society is the function of a nation’s relationship with print culture—a Faustian pact with books. Moving from early Orientalist collections, to the Nazi magazine Weltliteratur, to the European Digital Library, Mani reveals the political foundations for a history of world literature that is at once a philosophical ideal, a process of exchange, a mode of reading, and a system of classification. Shifting current scholarship’s focus from the academic to the general reader, from the university to the public sphere, Recoding World Literature argues that world literature is culturally determined, historically conditioned, and politically charged.

Here, Abbate explores the untold history of women in computer science and programming from the Second World War to the late 20th century. Demonstrating how gender has shaped the culture of computing, she offers a valuable historical perspective on today’s concerns over women’s underrepresentation in the field.

The literature on recoding is scattered, so this superb book 7hs a need by prov- ing up-to-date, comprehensive, authoritative reviews of the many kinds of recoding phenomena. Between 1961 and 1966 my colleagues and I deciphered the genetic code in Escherichia coli and showed that the genetic code is the same in E. coli, Xenopus laevis, and guinea pig tissues. These results showed that the code has been c- served during evolution and strongly suggested that the code appeared very early during biological evolution, that all forms of life on earth descended from a c- non ancestor, and thus that all forms of life on this planet are related to one another. The problem of biological time was solved by encoding information in DNA and retrieving the information for each new generation, for it is easier to make a new organism than it is to repair an aging, malfunctioning one. Subsequently, small modi?cations of the standard genetic code were found in certain organisms and in mitochondria. Mitochondrial DNA only encodes about 10–13 proteins, so some modi?cations of the genetic code are tolerated that pr- ably would be lethal if applied to the thousands of kinds of proteins encoded by genomic DNA.

Recoded City examines alternative urban design, planning and architecture for the other 90%: namely the practice of participatory placemaking, a burgeoning practice that co-author Thomas Ermacora terms ‘recoding’. In combining bottom-up and top-down means of regenerating and rebalancing neighbourhoods affected by declining welfare or struck by disaster, this growing movement brings greater resilience. Recoded City sheds light on a new epoch in the relationship between cities and civil society by presenting an emerging range of collaborative solutions and distributed governance models. The authors draw on their own fresh research of global pioneers forging localist design strategies, public-realm interventions and new stakeholder dynamics. As the world becomes increasingly digital and virtual, a myriad of online tools and technological options is becoming available. These give unprecedented co-creation opportunities to communities and professionals alike, yielding the benefits of a more open – DIY – society. Because of its close engagement with people, place and local identity, the field of participatory placemaking has huge untapped potential. Responding to the challenges of the Anthropocene era, Recoded City is for decision-makers, developers and practitioners working globally to make better and more liveable cities.

Why has it taken so long to make computers work for the museum sector? And why are museums still having some of the same conversations about digital technology that they began back in the late 1960s? Does there continue to be a basic ‘incompatibility’ between the practice of the museum and the functions of the computer that explains this disconnect? Drawing upon an impressive range of professional and theoretical sources, this book offers one of the first substantial histories of museum computing. Its ambitious narrative attempts to explain a series of essential tensions between curatorship and the digital realm. Ultimately, it reveals how through the emergence of standards, increased coordination, and celebration (rather than fearing) of the ‘virtual’, the sector has experienced a broadening of participation, a widening of creative horizons and, ultimately, has helped to define a new cultural role for museums. Having confronted and understood its past, what emerges is a museum transformed – rescripted, re calibrated, rewritten, reorganised.

Taking advantage of the vast informational resources available to him, Dan Gonzalez developed a passing system that combined ideas from some of the most vaunted offenses in pro and college football. He later enhanced that system so that youth players could learn and execute the same concepts and techniques. Further, the same concepts have been used to aid high schools in not only developing school record holders, but perennial playoff contenders and state champions as well. Gonzalez now delves into the theory and teaching that goes behind the playbook and into the coaching behind the “Xs and Os.”

'Business Recoded is a great source of inspiration for leaders who want to explore, shape and prepare themselves for the future.' ALEXANDER OSTERWALDER, author of Business Model Generation and The Invincible Company 'It is not often that we have moments of magic in any business. What Peter has given us is more than just ideas and inspiration, but a whole way of thinking about how we could reinvent our future, and start making it happen tomorrow.' ALBERTO UCCINI-MANGANELLI, GM and SVP, Adidas 'With energy, enthusiasm and a deep reservoir of fantastic examples, Peter Fisk maps out what each of us needs to do in order to re-calibrate ourselves and our organizations to create the future. Business Recoded is persuasive and compelling.' STUART CRABNER, founder, Thinkers50 'Peter Fisk's excellent new book, Business Recoded, will help 'recode' your business by tapping into the minds of some of the world's most brilliant business leaders. It's a must-read for anyone in need of a quick fix of inspiration and tried-and-tested advice.' MARTIN LINDSTROM, author of Buyology and Small Data 'Peter Fisk is a terrific storyteller with an encyclopaedic grasp of best business practices across the globe. If you want to disrupt the future of your business, this book is your decoder ring.' WHITNEY JOHNSON, author of Disrupt Yourself 'A brilliant collection of practical guidelines intended to refresh and reinvent our mindsets, from a global thoughtful leader with vast experience in management development.' SANTIAGO INIGUEZ, President of IE University. 'Business Recoded is definitely a must-read for leaders that want to succeed with their organizations in our fast-changing world.' ANTONIO NIETO-RODRIGUEZ, author of The Project Revolution Business needs a new code for success! Change is dramatic, pervasive and relentless. The challenges are numerous. The opportunities are greater. Incredible technologies and geopolitical shifts, complex markets and stagnating growth, demanding customers and disruptive entrepreneurs, environmental crisis and social distrust, unexpected shocks and uncertain futures. The old codes that got us here don't work anymore. Moving forwards needs a new mindset. Business Recoded is for business leaders who seek to progress in today's rapidly changing world, and to create the organisations that will thrive in tomorrow's world. It explores how to lead a better future, to reimagine your business, to reinvent markets, to energise your people. It describes how to combine profit with more purpose, intelligent technologies with creative people, radical innovation with sustainable impact. It dives deep into the minds of some of today's most inspiring business leaders - people like Anne Wojcicki and Jeff Bezos, Emily Weiss and Devi Shetty, Daniel Ek and Tan Le, Mary Barra and Masayoshi Son, Satya Nadella and Zhang Ruimin. Learn from the innovative strategies of incredible companies - Alibaba and Amazon, Babylon and BlackRock, Meituan Dianping and Microsoft, Narayana Health and Netflix, Patagonia and PingAn, Spotify and Supercell, and many more. The book is built on 7 seismic shifts driving a more enlightened future of business, unlocking 49 codes that collectively define a new DNA for organisations and their leadership. It's about you - realising your own codes for more enlightened progress, personal and business success. Do you have the courage to create a better future, for you and your business?'

Addresses the need for peer-to-peer computing and grid paradigms in delivering efficient service-oriented computing.
