The SCQF is a way of comparing Scottish qualifications to other qualification frameworks. It does this by giving each qualification a level and a number of credit points. The level of a qualification shows how difficult the learning is. The credit points show how much learning is involved in achieving that qualification.

This book assesses the impact and implementation of national qualifications frameworks in sixteen different countries. It presents two major lessons for policy makers thinking of introducing a National Qualifications Framework (NQF). First, that an NQF is only a way of framing existing provision; it cannot on its own, lead to the acquisition of skills or knowledge. Second, as an attempt to standardize learning- something that is only to a limited extent standardizable, NQFs have disadvantages as well as advantages. The research was funded by the International Labour Organization (ILO) and the European Training Foundation (ETF) and, partly as a result of the ILO/ETF Report, the Editors were asked by the World Bank to help them in advising the government of India on introducing a NQF for vocational qualifications. Building on the findings of the report, the editors of this book presented an NQF implementation strategy to the Government of India on behalf of the World Bank. It laid out the steps and stages that would be involved and took account of the earlier experiences of introducing an NQF. Although this strategy was prepared specifically for the Government of India, others who have read it felt it deserved wider circulation. The report has therefore been included in this volume. Since this research was undertaken, the number countries, especially developing countries, implementing or introducing a NQF has continued to increase. This book will be of interest to policy makers and researchers. This book was originally published as a special issue of the Journal of Education and Work.

The highly anticipated new edition of Pain: a textbook for health professionals (previous subtitle a textbook for therapists) has undergone a major rewrite in order to reflect the rapid developments in the field of pain management. It highlights an effective and evidence-based method, providing the theoretical basis to help with the assessment and management of persistent pain, while also discussing in depth a range of specific approaches. Pain: a textbook for health professionals is written emphatically from a biopsychosocial perspective. In order to set the scene, the introductory section includes chapters on the patient 's voice and social determinants of pain. This ensures that the deeply personal and social aspects of pain are not lost among the more technical and biological commentary. These aspects provide an overall context, and are revisited in chapters on participation of life roles, work rehabilitation and psychology. The basic science section includes key chapters on the psychology, neuroanatomy and neurophysiology of pain. This provides a basis for subsequent chapters on specific approaches such as pharmacology, physical therapy and complementary medicine. Pain in specific patient groups, including children, the elderly and those with cancer, are dealt with in separate chapters, as are pain problems such as complex regional pain syndrome and chronic spinal pain. Although the emphasis of the book is on long term pain, acute pain is discussed as a possible precursor and determinant of chronicity. Patient-centred approach to care – advocates listening to the patient 's voice Covers social determinants of pain Guides the reader from pain psychology to the practical application of psychological interventions Learning aids – chapter objectives, reflective exercises, case examples, and revision questions Emphasizes an evidence-based perspective Written by an international team of experts topics such as pain in children and the elderly, pain education for professionals, disability and medico-legal aspects expanded focus on complex regional pain syndrome, acupuncture and psychology improved layout for a better learning and studying experience

In Deutschland und auch in anderen europ ä ischen Staaten wird dar ü ber diskutiert, wie beruflich relevantes Erfahrungswissen besser erfasst und sichtbar gemacht werden kann. Formale Abschl ü sse sichern bisher die Teilhabe am Arbeitsleben. Menschen lernen jedoch auch informell in Beruf und Freizeit sowie nonformal in der Weiterbildung - also kontinuierlich und ü ber formale Bildungseinrichtungen hinaus. Diese Kompetenzen gelten bisher wenig, obwohl sie f ü r die berufliche Handlungsf ä higkeit in vielen F ä llen bedeutender sein m ö gen als formell zertifiziertes Wissen und K ö nnen. Vor allem formal Geringqualifizierte und Zuwanderer k ö nnen profitieren. Ein Anerkennungssystem hilft besonders ihnen, aber auch den anderen Erwerbst ä tigen sowie den Unternehmen, wenn es darum geht, alle berufsrelevanten Kompetenzen verwertbar zu machen. In einigen L ä ndern Europas gibt es bereits Verfahren mit Zertifikaten, die auf dem Arbeitsmarkt anerkannt sind. Anhand von sieben europ ä ischen L ä ndern wird ein Überblick gegeben, wie die Anerkennung von Kompetenzen in Bezug auf Rechtsgrundlagen, Instrumente und Verfahren, aber auch hinsichtlich Finanzierung, Institutionalisierung und Supportstrukturen funktionieren kann. Die in diesem Buch illustrierten Erfahrungen anderer L ä nder geben Deutschland auf dem Weg zu einem verbindlichen Anerkennungssystem wichtige Hinweise f ü r wirksame L ö sungen.

This book shows how to design and develop educational programmes that are linked, logical and successful, with clear, step-by-step guidance on the processes involved. It shows how to develop courses that successfully meet quality and assessment criteria (including those set by the Quality Assurance Agency), and provides a route map through the various elements involved. The author shows how to design modules with clearly defined levels for assessment, outcomes and quality criteria, and which meet standard teaching and learning expectations.

Developed to be accessible, straightforward, systematic and practical, it is illustrated throughout with examples and concise summaries. Key features include: *clear, simple guidance on developing a module *understanding levels and level descriptors *setting aims and learning outcomes *developing assessment methods and criteria *devising teaching strategies *staff development activities *guidance on programme specification.
