24 Signs of a Highly Sensitive Person | Psychology Today

A highly sensitive person (HSP) experiences the world differently than others. Due to a biological difference that they're born with, highly sensitive people are more aware of subtleties and process information deeply.

21 Signs That You're a Highly Sensitive Person (HSP)

Highly sensitive people are mistaken as weak and broken by the majority of their peers. Yet this is a false perception, as they are just as strong while feeling their emotions more intently. They are not broken or weak, and in most cases are much stronger than meets the eye. There are many gifts that come with being a highly sensitive person.

15 Life-Saving Survival Tips For The Highly Sensitive Person

If you answered more than fourteen of the questions as true of yourself, you are probably highly sensitive. But no psychological test is so accurate that an individual should base his or her life on it. We psychologists try to develop good questions, then decide on the cut off based on the average response.

Are You Highly Sensitive? - The Highly Sensitive Person

The definition of a highly sensitive person is someone who experiences acute physical, mental, or emotional responses to stimuli. This can include external stimuli, like your surroundings and the people you're with, or internal stimuli, like your own thoughts, emotions and realizations.
