Over much of the past century, the law governing third-party importation of non-counterfeit, genuine goods has been obscured by conceptual uncertainty. In recent years, the debate over the gray market has centered on the fundamental reasons for trademark protection, and has raised the possibility of conflict between the two traditionally recognized purposes of trademark law--protecting consumers from deception and protecting trademark owners from lost sales. Hiebert discusses the evolution of the universality and territoriality principles of trademark law, and develops a new understanding of the role of goodwill in resolving trademark infringement issues. Beginning with a review of the earliest days of trademark law, Hiebert traces the development of the twofold purpose and territoriality doctrines in the United States, and examines in detail the cases, statutes, and regulations governing parallel imports.

Unlike other recent treatments of the subject, this work benefits from the availability of important archival materials, and devotes considerable attention to the nineteenth-century antecedents of modern parallel importation doctrine, and to the evolution of trademark doctrine within the broader context of American legal realism.

In *War, Wine, and Taxes*, John Nye debunks the myth that Britain was a free-trade nation during and after the industrial revolution, by revealing how the British used tariffs--notably on French wine--as a mercantilist tool to politically weaken France and to respond to pressure from local brewers and others. The book reveals that Britain did not transform smoothly from a mercantilist state in the eighteenth century to a bastion of free trade in the late nineteenth. This boldly revisionist account gives the first satisfactory explanation of Britain's transformation from a minor power to the dominant nation in Europe. It also shows how Britain and France negotiated the critical trade treaty of 1860 that opened wide the European markets in the decades before World War I. Going back to the seventeenth century and examining the peculiar history of Anglo-French military and commercial rivalry, Nye helps us understand why the British drink beer not wine, why the Portuguese sold liquor almost exclusively to

Britain, and how liberal, eighteenth-century Britain managed to raise taxes at an unprecedented rate--with government revenues growing five times faster than the gross national product. *War, Wine, and Taxes* stands in stark contrast to standard interpretations of the role tariffs played in the economic development of Britain and France, and sheds valuable new light on the joint role of commercial and fiscal policy in the rise of the modern state.

While the investigations go on in Dallas and Baton Rouge after the disappearance of a senator's daughter, FBI agents CJ Johnston and Paige Riley are assigned to the sleepy backwoods of East Texas for a dead-end assignment to infiltrate an all-girls school. Random disappearances dating back fifty years and more raise red flags that point to the tiny, isolated community of Hoganville. But CJ and Paige fear there will be little distraction from the memories of the one-night stand they shared six months ago. Nevertheless, they integrate themselves into the lives of the teachers and staff, but soon the odd behavior of the townspeople has them convinced something sinister lurks there. Something, perhaps, that even the residents of Hoganville don't know about. Six-time Goldie winner Gerri Hill delivers thrills and passion in the chilling *Keepers of the Cave*.
